

Bruno Amaral Salles

Computer Engineering Undergraduate

Campinas, SP | (62) 98531-2577 | brunosalles574@gmail.com | [linkedin.com/in/brunoasalles](https://www.linkedin.com/in/brunoasalles)

Computer Engineering undergraduate with experience building Machine Learning solutions, Data Engineering and backend systems for pricing and credit. Deep Reinforcement Learning and Robotics researcher at H.IAAC.

PROFESSIONAL EXPERIENCE

BTG Pactual (07/2026)

AI Engineering Intern

São Paulo, SP

- Built an **AI agent to analyze Wealth Management credit-exception requests**, generating structured recommendations and rationales for analyst review across a **15.000 request per month** workflow and achieving **75% agreement** with labeled historical decisions.
- Built a unified Customer Vision data pipeline, consolidating credit exposure, bureau, income, payment, investment, collateral, and bank relationship data. Equipped the agent with S3 data access and Python analytics tooling.
- Technologies: Python, PySpark, OpenAI, AWS (S3, Athena), SQL

BTG Pactual (01/2026 – 02/2026)

Software Engineering Intern

São Paulo, SP

- Built a Spring Boot integration layer connecting core financial services with **300+ B2B investment partners**, enabling real-time account positioning within the Investment as a Service (IaaS) squad.
- Optimized data retrieval with Redis caching, ensuring low-latency and cost-efficient responses for high-demand microservices (bypassed 200GB+ redundant data queries in Athena). Automated financial reporting pipelines - such as partner analytics and financial product data - via **Kafka** and **AWS** ecosystem, streamlining operational workflows.
- Technologies: Java, Spring Boot, Redis, PostgreSQL, Kafka, AWS (Athena, Redshift, S3), Git

Gerdau Brasil (12/2024 – 02/2025)

Data & AI Intern

São Paulo, SP

- Developed a V2 ML price elasticity model to power **dynamic pricing** for flagship products, increasing high-confidence pricing recommendations by 7x and overall model precision by **37%**. Built a data pipeline processing 3 years of historical sales data, reducing execution time by **90%**.
- Developed data analysis and interactive Power BI dashboards to guide executive Pricing strategy. Presented the end-to-end project, **in English**, to a global audience of **100+ stakeholders**, at the global Data&AI Summit.
- Technologies: Python, PySpark, Databricks, Pandas, Numpy, Scikit-Learn, PowerBI

H.IAAC - Cognitive Architectures and Artificial Intelligence Hub (05/2025 - Present)

Undergraduate Researcher

- Research on **Artificial intelligence applied to Robotics**, focusing on bimanual robotic manipulation.
- Building neuro-inspired and curiosity driven models in the intersection between neuroscience, cognition and **Reinforcement Learning** to enhance autonomous agent adaptability in dynamic environments
- Technologies: Python, Reinforcement Learning, Statistics, Pytorch, Data Analysis

EDUCATION

Universidade Estadual de Campinas (Unicamp)

Bachelor's in Computer Engineering (2024 – Present)

Campinas, SP

Expected Graduation: November, 2027

PROJECTS AND INITIATIVES

Olá, Mundos! - Social Project (06/2024 - 12/2025)

Volunteer - Lead Programming Instructor

Campinas, SP

- Directed a **10-person educational team** and instructed Python and Mathematics classes to low-income public school students, democratizing access to technology education. Mentored a cohort of about 30 students, resulting in **1 admission to Unicamp and 10 acceptances** into ETECs and STEM programs.

AlohaVR - VR Robotic Teleoperation (08/2026)

- Real-time **VR-based bimanual robotic manipulation system** built on top of AV-ALOHA integrating Meta Quest and MuJoCo, exploring the role of active vision in fine manipulation tasks. Deployed the demo at UPA 2026, where it was used by **130+ visitors**.

BrandLoop - Agentic Marketing Platform (08/2026)

- AI-based marketing agency spanning brand data ingestion, adaptive interviews, market research, copywriting and video generation. Designed to transform each brand unique knowledge and positioning into differentiated campaigns

ADDITIONAL INFORMATION & SKILLS

- Languages: Portuguese (Native), English (Fluent) and French (Basic)
